

## EYE EXAMINATION SERVICES INCLUDE:

- **comprehensive eye exams** - the works! Involves vision assessment, determination of spectacle prescription, internal and external eye disease assessment, assessment of depth perception, colour vision, eye muscle co-ordination, pupil function and eye pressure. You'll find out whether we can improve your vision and whether you're at risk of eye disease.
- **contact lens fitting** - sorting out the contact lens that's going to meet your needs.
- **short consultations** - to remove foreign bodies, treat red eyes or eye infections, syringe your tear ducts, assess sudden new developments with your vision, sort out a vision certificate for your drivers licence, find lost contact lenses and so on.
- **contact lens aftercares** - progress checks for new contact lens wearers, which are vital to arriving at the right lens for you.
- **retinal photography** - providing a really valuable record of the appearance of the inside of your eye for future comparison.
- **visual field exams** - these provide us with further assessment of your peripheral visual function - helpful for diagnosing glaucoma, and other eye disease.
- **civil aviation exams** - for all the budding pilots out there.
- **dilated retinal exams** - eye drops are used to make your pupils larger, allowing a more detailed inspection of the inside of your eye.

*Available only at Ali's Eye Care Clinic*
